:p see u tomorrow chaaa you said you wanna download something? ZMX thoda u can download something else :d oh no i don't want anything but good night :) thank you Sia i'll see you some other time oky pkrosh see u later which of these flavors would be most appropriate to install from a usb drive? lubuntu, xubuntu or ubuntu they all look pretty much the same to me and the same hardware should be compatible with all of them. I don't know if a usb drive is the best way to get this system on the net for remote use but I'm not at all knowledgeable about getting a workstation online ubuntu, xubuntu or lubuntu? lubuntu, xubuntu or ubuntu? do I install a gui in all 3 of them? or does one install a gui and one does not? Hi, when i install updates for 13.04 to 13.10 it makes 2 bootmgr files.. will this be an issue in case i have to reinstall? if anyone can help me with the above I would be much appreciative !anyone | urthmover urthmover: A high percentage of the first questions asked in this channel start with "Does anyone/anybody..." Why not ask your next question (the real one) and find out? See also!details,!gq, and!poll. urthmover: i'd suggest ubuntu. but i'm guessing. i've no idea how to get a desktop on the internet. best of luck. 82157476af
