Seems really nice! Such realistic, but I have low-spec comp so can you work some on optimisation?. A nice revamp of the original Creeper World. While it's still a little rough around the edges, and much slower than later games, this is the one that started it all. I remember first playing the demos on Kongregate, doing my best to outsmart the Creeper and figure out the best strategy to activate the totems and escape to the next world.

Is it the best game out there? No, probably not. But it definitely is one of the best indie games I've ever played, and I've no regrets in picking it up in the Steam Autumn Sale. I might get bored with it in time, even with all the challenge maps and user created levels (not to mention the feature which creates a map based on the date you enter in!), but it'll last me a while yet. And I've still got two more games to go through! Three, if you count Particle Fleet.

I definitely recommend giving this game a try. I don't know of any other strategy game out there like it. Fighting creeps and minions is one thing. But fighting a literal flood of pure destruction? I imagine if it hasn't been copied already, it's only because doing so would require more effort than most shovel-ware developers are willing to put in.

Give it a try. Be careful, though. You might find it a bit addictive. You just might see the sunrise for the first time in years! (Unless you play Civilization a lot. Then for you, it's Tuesday.). <https://youtu.be/FApToapL230>

[a fun little beat'em up game nothing too special about it aside from the fact that if you have a touch screen monitor you can use touch controls other than tha its a decent game and clearly was made for tablet gaming. only downside is only one playable character. If you want to know the full extent of the game check out the video review above. Pay to win This could be a time passer but is just a real miss](#)

[Match making is horrible Level 10 vs Level 2.](#)

[Definetly not a steam caliber game. Needs to stick to iTunes and Google Play. this game is soo fun to play :D .I had a splendid 40 minutes walking around collecting shrooms and then sadly got stuck in between a rock and tree. So I restarted and recollected all of my shrooms and skulls again and was able to finish the game.](#)

good game :)!!!. MY Opinion: 8.5-10 . A great indie,casual/puzzle game with a nice music blend. Done well.

Pros:

Great Sountrack.

Easy to pick up.

Great replayability (Better with friends).

Cool stylized art style.

Cool Concept.

Local play (YES CONTROLLER SUPPORT :D!)

Great Price.

Cons: (That i can live with)

No Ai to play against as far as im aware of.

No leaderboards

No Online play. This is an exceptionally well done game. The attention to detail is outstanding.

It basically follows the 16-bit (SNES, Genesis, Amiga, etc) style of platformer except here everything is in HD. The levels are colorful, well drawn and most important there is a good amount of interaction.

The gameplay is very good! It's the kind of game that encourages exploration with the idea that if you die no big deal you've learned something so try again armed with the knowledge you just gained. That is old school. And here it is very well done.

The pace of the game is a bit on the slow side for my personal taste but certainly not so much as to ruin the game. The only part that I think absolutely should be faster is when you die. I don't want to wait for my bunny angel to rise up to heaven. Perhaps there is a way to skip that sequence but I have not found it yet. When I die I want to be able to immediately get right back to the start of the level and start playing again.

Besides that this game is excellent! Oh another thing I want to mention is the music & sounds. Both are superb. The music puts me in a sort of fun lazy mood. The sounds are very effective at complementing the on-screen interaction. Overall the entire game is very well done and it is easy to see the developer spent a lot of care and time creating this game.

Highly recommended if you enjoy platform games.. I just lost 1.2 hrs of my life playing this. I found myself yelling curse words at the dudes shooting me and I lol'ed

Pros:

decent looking

easy controls

stupid as F

mindless time killer

Cons:

It's a moble app port so there are weird artifacts from the cash shop in it. (ex get 100 gems to unlock an upgrade then after that you can buy them with coins.)

No real goal but meh

TLDR silly time waster. As tactical games go, this one is missing almost everything. There is no opportunity fire, no real tactical options at all.

The UI is also a mess, hard to figure out, with no manual or online help. The "tutorials" are videos that belabor the obvious and don't cover anything important about game mechanics.

I'm calling this one the dud of the holiday sale.. Asking \$9 for this game is underpaying in my honest oppinion. This game is fantastic. I would be willing to pay \$15 personally.. i can't open the game, even steam client is opened also. While this game was clearly created on a low budget, it is clear that they put a lot of effort in it.

The combat may feel a bit clunky at times, but the two characters mechanic was interesting.

But most of all, the story was very good and drove forward the whole game.. After loading into the first mission, I was overwhelmed by the super immersive experience. The voice acting is something out of Portal 3. I absolutely love how in order to skip cutscenes, you have to press space; but, the developers decided to also bind 'space' to take a screenshot. After 21 minutes of gaming I had 13 screenshots. The enemies have such amazing awareness it can not even compete with ARMA. They enemy either see you from out of render distance (non adjustable), or you can walk with them as they search for you in the brush.. Complete and utter rubbish basically, especially towards the end of the game. Sure the game is informational but the rest is just holding down Enter and watching the game play itself.
